Subject: centre county dump site

To Whom It Concerns,

My name is Steve Heiser. I am a resident of Lancaster co. PA. and I frequently travel to the Snow Shoe Rail to Trail System to enjoy the activities there. There are other areas I can go for ATV riding but my friends and I prefer the snow shoe area because of its beauty and the people of the area. It is my understanding that the section of rail bed from Wallaceton to Gorton is under consideration to be re-activated for access to the proposed land fill. The proposed land fill is a bad idea for the area. It will de-value the local property and send a signal to people like me that its time to find another place to spend my time and money. I would hate to loose the opportunities available to myself and others who have invested time and money to make this area attractive to outdoor enthusiasts of all interests. Please do not allow the rail bed to be re-activated for the purpose of a dump site!

Respectfully, Stephen J. Heiser
